# 2023 in-home screening outreach underway

As part of our in-home screening outreach program, eligible UnitedHealthcare commercial plan members may receive one of the following throughout May and June:

- A Fecal Immunochemical Test (FIT) based on their prior completion of a screening
- A letter or email allowing them to opt in via an online web portal to receive an at-home FIT screening kit beginning in May
- A letter or email encouraging them to order a Hemoglobin A1C (HbA1c), estimated glomerular filtration rate (eGFR) or a urine albumin-creatinine ratio (uACR) screening kit
- A phone call to schedule an in-home retinal eye exam with the option of receiving an at home A1C or FIT kit when applicable

## What this means for you

You don't need to do anything for members to receive these kits or to complete these in-home screenings. We wanted to make you aware of these upcoming communications in case your patients reach out to you with questions.

## Members who want to receive a kit

Members who opt in and order a kit must use their personal invitation code included in the email or letter we sent them. We'll also mail members a letter to remind them to send in their kits if they haven't returned them in 14 days.

## After members complete the screening

Once completed and returned, we send the results to the member and their physician. We'll also call or send a letter to members with a positive or abnormal FIT result encouraging them to follow up with their physician.

## Questions?

For questions, call the number on the member's health plan ID card.
