FINDING THE RIGHT MEDICATION JUST GOT MORE PERSONAL

Hello [Name],

Your care is our top priority, and it's why your [Blue Care Network] plan comes with services and programs to manage your health and well-being. Our newest program, Blue Cross Personalized MedicineSM, can help ensure your medications are tailored to you. And you're eligible for this program **at no cost**.*

How it benefits you

As part of our program, you get a free RightMed[®] Test by OneOme[®], which shows how your body processes medications. The test helps:

- Identify which medications are less likely to cause negative side effects
- Find the best medication for you earlier in treatment
- Customize your medications for years to come

How it works

Step 1: Request your free RightMed Test kit at www.myrightmed.com/bcbsm.**

Your test kit will be mailed to your home in a blue bag after your health care provider gives approval.

Step 2: Collect a test sample. Swab the inside of your cheek and mail it back in the package provided. A pharmacist will analyze your results.

Step 3: Receive your results. Only you, your health care provider and the pharmacist will receive your test results through OneOme's secure website.** **Blue Cross isn't involved in the test process and will never receive your results.**

Step 4: Consult with your health care provider. Together, you and your health care provider can decide on next steps.

Feel confident your medications are working for you. I encourage you to talk with your primary care provider about this program. If you have questions, contact OneOme directly. Email support@myrightmed.com** or call **1-844-663-6635**.

Sincerely,

Dr. Scott Betzelos, MD
Vice President, Blue Care Network
